

We are a growing. Therefore, we are looking for the following full-time employee for our office in Munich

Technical Certifier (m/w/d)

for the area of GNSS certification in the fields of eCall (automatic vehicle emergency call), automated driving, tolling systems and UAS (Unmanned Aerial Systems)

Responsibilities

- Handling of certification processes and conformity evaluation processes according to respective regulations in the accredited area
- Assurance of the application of the QM system in the department
- Representation of the department in front of external actors within the framework of talks, lectures, and meetings with clients
- Clarification of technical questions raised by project leaders, auditors, experts in the field and clients on behalf of certification managers
- Technical handling of appeals from clients
- Support of the certification body's management by formulating replies to queries and requests of competent authorities
- Support of the certification body's management with the organisation of audits from the authorities
- Assistance for surveys or evaluations in audits carried out by the authorities
- Carrying out technical evaluations and making the final decision regarding certifications and maintenance of certification
- Discussion with prospects regarding project scope and management as well as technical issues
- Planning and performance of tests for certification to applicable national and/or international standards or internal schemes
- Draft of test plans for certification
- Review and evaluation of product documentation; validation of fulfilment of certification criteria and issue certification as appropriate
- Preparation of test reports; confirmation of compliance or non-compliance, communication of results to customers
- Review of reports from other colleagues

We are a service company offering verification, validation, and certification in the environment of positioning and navigation worldwide. We are the experts in the field of GNSS, as we are the only accredited test laboratory in Europe in the scope of GNSS. In addition, we are a Notified Body (NB 2603).

Requirements

- Technical background (master's degree in engineering)
- 1-3 years working experiences in a certification body or at least 4 years working experience in an accredited technical laboratory
- Understanding and experience of use and interpretation of ISO 17065 or similar
- Basic knowledge in GNSS
- Willingness to travel
- Ability to work both independently and in a team.
- Strong client service skills to ensure an effective and responsive interaction with clients (internal and external)
- Resilience and high ability to handle challenging situations, including stressful times, and assurance of regulatory compliance and protection of business interests
- Open for continuous learning and expanding existing knowledge
- Proficient in German and English language

Why you should apply.

- Permanent employment contract in a fast-growing company with flexible working hours
- Working in challenging areas like UAS
- Continuous education and training for further qualification
- Active participation in (international) conferences and standardization groups
- Relaxed atmosphere and flat hierarchies
- Modern office with retreat and relaxation facilities
- Possibility to work in a home office
